

Ansh Kumar Vashishtha

Software Development Engineer | Backend & Full-Stack Development

ansh.work.3366@gmail.com | +919411603040 | LinkedIn | GitHub

Career objective

Recent B.Tech Computer Science graduate with hands-on experience in software development, Python, C++, JavaScript, SQL, REST APIs, testing, and debugging. Strong foundation in Data Structures Algorithms, Object-Oriented Programming, software design, problem solving, and database-driven application development. Experienced in building, testing, and debugging web applications and RESTful services using React.js, Node.js, Express.js, Git, and Postman.

Projects

Team Task Manager (Orbit)

- Implemented secure authentication and role-based access control (RBAC) for Admin and Member users.
- Designed and implemented 13 RESTful APIs for authentication, user, project, and task management, including CRUD operations.
- Developed responsive web interfaces using React.js, JavaScript, HTML, and CSS, integrating frontend components with backend REST APIs.
- Tested and debugged REST APIs using Postman and validated functionality across frontend and backend components.

InvisiData – Document Processing Tool

- Built a web application for automated document processing, text extraction, and identification of sensitive information from uploaded files.
- Implemented OCR-based text extraction using Python and Pytesseract with Regex-based pattern matching for structured data identification.
- Used OpenCV for document and image preprocessing to improve the reliability of extracted text.
- Implemented automated data processing workflows for handling and analyzing extracted document information.

Education

Teerthanker Mahaveer University, Bachelor of Technology (B.Tech) - Computer Science and Engineering

Sep 2022 – May 2026

Achievements and Certifications

- Flipkart Grid 6.0 – Software Engineer Level 1 Qualifier
- Participated in coding competitions and hackathons, delivering software solutions under tight deadlines.
- MongoDB Basics – MongoDB University
- Responsive Web Design – freeCodeCamp

Skills & Technologies

Languages : C++, C, Python, JavaScript, SQL

Software Engineering : Data Structures & Algorithms, Object-Oriented Programming, Software Design, Software Development, Testing, Debugging, Problem Solving

Web, Backend & APIs : React.js, Node.js, Express.js, HTML5, CSS3, REST APIs, API Integration, JSON

Databases : Microsoft SQL Server, MongoDB, SQLite, DBMS

Tools Technologies : Git, GitHub, VS Code, Postman, npm, Railway.

Development Concepts : Authentication, Authorization, RBAC, CRUD
