

Ansh Kumar Vashishtha

Software Engineer | Full Stack Developer

ansh.work.3366@gmail.com | +919411603040 | LinkedIn | GitHub

Summary

Recent B.Tech Computer Science graduate seeking an entry-level Software Engineer role. Skilled in React.js, Node.js, Express.js, MongoDB, JavaScript, Python, REST APIs, and Data Structures & Algorithms. Passionate about building scalable web applications and solving real-world problems.

Projects

Team Task Manager (Orbit)

- Developed a full-stack team and project management application with secure role-based access control (Admin/Member).
- Designed and implemented 13 RESTful APIs for authentication, user management, project management, and task operations.
- Integrated SQLite database and deployed the production-ready application on Railway
- Live Demo: <https://task-manager-production-63d6.up.railway.app/>

Smart Camera Vision Technology

- Built a web application using YOLOv5 and OpenCV to detect damaged products, check freshness, and extract expiry dates using OCR.
- Developed a Flask REST API to process uploaded images and display detection results on the web interface.
- Generated PDF reports with product details, detected issues, and expiry information for quality inspection.
- Used Python, OpenCV, and Pytesseract to automate product inspection and improve quality monitoring.

InvisiData – AI-Based PII Protection Tool

- Built an AI-powered tool to identify and hide sensitive information from Aadhaar cards, hospital records, PAN cards, and other personal documents.
- Used Python, Streamlit, OCR, NLP, OpenCV, and Regex to automatically detect and redact confidential data.
- Developed a simple web application for secure file upload, preview, and download of redacted documents.
- Improved document privacy by following **GDPR** and **HIPAA** data protection guidelines.

Education

Teerthanker Mahaveer University, Bachelor of Technology (B.Tech) - Computer Science and Engineering

Sep 2022 – May 2026

Achievements and Certifications

- Flipkart Grid 6.0 – Software Engineer Level 1 Qualifier
- Participated in coding competitions and hackathons, delivering software solutions under tight deadlines.
- MongoDB Basics – MongoDB University
- Responsive Web Design – freeCodeCamp

Skills & Technologies

Languages : C/C++, C#, ASP.NET, JavaScript, SQL

Frontend : React.js, React Router, Tailwind CSS, Bootstrap, Responsive Design, React Hooks

Backend : Node.js, Express.js, Flask, REST APIs, JWT Authentication, Authentication & Authorization

DataBase : MongoDB, SQLite, Microsoft SQL Server

Tools Technologies: Git, GitHub, VS Code, Postman, npm, Railway, Streamlit, OpenCV

Core Competencies : Data Structures Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
